## PROJECTS

**E-Commerce Website:** Developed an online booking platform for the hotel industry. The platform allows users to browse, select, and book rooms with ease. Integrated features such as detailed room listings, secure payment processing, and streamlined reservation management, significantly enhancing the user experience and operational efficiency.

**Portfolio Website:** In this project, I created a dynamic portfolio website and hosted it on the Internet. The site features effective coding practices, a simple user interface, and a clear user experience. It includes backend support for a contact form and showcases my full potential.

**Form Validation System:** Designed and implemented a form validation system for a student registration process. The system ensures accuracy and security of student information through real-time checks, preventing errors and streamlining data entry. This led to a smoother registration experience and increased system reliability.
